At Memorial Sloan Kettering we have positions open at the faculty level (where candidates will engage in collaborate work but are expected to develop self-initiated independent research interests) and also at the non-faculty Principal Biostatistician level (designed for doctoral graduates who are excellent collaborators but have no aspirations to conduct independent research). We would love to have Hopkins graduates work with us.

Details for the faculty position: https://www.mskcc.org/departments/epidemiology-biostatistics/jobs/epidemiology-biostatistics-faculty-position-biostatistics and for the principal position: https://www.mskcc.org/departments/epidemiology-biostatistics/jobs/doctoral-level-biostatistician.

Please encourage your students to reach out to me if they have any questions.

Many thanks in advance and hope I will get to see you again soon.

Best,
Mithat
