AN INSPIRING SABBATICAL OPPORTUNITY FOR WORLD-CLASS STATISTICIANS.

The AbbVie Statistics Visiting Scholar Program In Honor of Dr. David C. Jordan
This program offers a rare opportunity to collaborate with AbbVie statisticians on research topics that are of interest to both you and our business. The final determination of specific projects does not need to be made prior to arrival, and areas of application may include clinical trials or a number of non-clinical applications.

ABOUT ABBVIE
AbbVie is a global, research-based biopharmaceutical company. We are setting out to break the mold in our sector by delivering a consistent stream of innovative medicines that solve serious health issues and have a remarkable impact on people’s lives. We draw on the expertise, collaboration and energy of a 25,000-strong global team that delivers medicines in more than 170 countries worldwide. For the full story of our people, portfolio and opportunities, visit www.abbvie.com.

ABOUT DR. DAVID C. JORDAN
This program has been developed in honor of Dr. David C. Jordan, who retired at the end of 2012 after a distinguished career with us spanning more than 30 years. Dr. Jordan led our Statistics and Data Management organization, growing it from about 20 statisticians and programmers to its current total of approximately 250 members. He actively participated in and led several high-level management forums within Research & Development. His work brought recognition of how statisticians contribute to strategic decisions at the highest levels of our company.

WHO CAN APPLY?
We’re looking for academic statisticians and biostatisticians to join us in a consulting and research position during their sabbatical (6 to 12 months). To be considered, you must have an outstanding research record in statistics, biostatistics, bioinformatics or a related field. It’s also essential that you have produced relevant publications in methodology and applied research. Not least, you must have excellent communication skills.

THE PROGRAM AT A GLANCE
AbbVie is located 40 miles north of downtown Chicago. Successful scholars will join us here as part of our Data and Statistical Sciences (DSS) organization. The DSS organization currently employs approximately 60 statisticians (40 having PhDs) and 35 statistical analysts/programmers, who provide scientific support for all phases of drug development and safety surveillance. Our Data Sciences group has a wide range of accountabilities, which include development and use of technology for data collection and database creation.

HOW TO APPLY
Interested applicants should submit a resume and cover letter for consideration to Richard Rode at richard.a.rode@abbvie.com. The closing date for applications is January 31, 2015.
