Eastern Virginia Medical School (EVMS) is seeking a faculty member for a full-time (12-month) position. Candidates should have a PhD in Biostatistics, Statistics, Data Sciences, or related fields. Candidates should provide evidence of promise or accomplishment in both methodological and interdisciplinary collaborative research. Areas of expertise should include survey sampling, multivariate analysis, survival analysis. Experience with modeling and analysis of data from health service and health outcomes research is particularly welcome.

The successful candidate will be expected to conduct collaborative research in the newly created Center for Health Analytics and Discovery (CHAD), with a focus on extramural funding. Additionally, the candidate will be expected to teach graduate courses, conduct and disseminating original research, advise and mentor graduate students in the Master of Public Health (MPH) program. Approximately one-third of the effort will be dedicated to the MPH program and two-third of the effort will be dedicated to CHAD.

As a new Center approved by the school's strategic plan, CHAD primary objective is to serve as the expert resources on methodological issues related to statistical analysis of medical and health data by providing statistical/epidemiological support in areas such as study design, data analysis, database development and data management, survey research, qualitative research, and other related services. CHAD main goals are to enhance EVMS research infrastructure resource, to improve the ability of investigators to draw valid inferences from big data and complex research questions, and to facilitate partnership with local and regional health system via research development.

The Hampton Roads region offers many opportunities for research collaboration with investigators in both healthcare and community-based settings. Notable campus centers include the Strelitz Diabetes Institute, the Jones Institute for Reproductive Medicine, the Glennan Center for Geriatrics and Gerontology, the M. Foscue Brock Institute for Community and Global Health, and the ODU Center for Global Health. The Graduate Program in Public Health enjoys close relationships with the School of Health Professions, the School of Medicine, health care providers, and public health communities. EVMS shares the Eastern Virginia Medical Center campus with Sentara Norfolk General Hospital (one of 11 acute care hospitals in a top integrated healthcare system) and Children’s Hospital of the King's Daughters (part of a multi-specialty health system offering comprehensive pediatric care).
The position offers a competitive salary and benefits package, commensurate with experience and level of appointment. Applications will be reviewed as received, and the position will remain open until filled. The desired start date is July 1, 2015.

Quality of Life: Located in the city of Norfolk, EVMS and ODU serve the southeastern region of Virginia known as Hampton Roads, as well as northeastern North Carolina. The area provides easy access to Virginia Beach, the Outer Banks, mountains, Washington D.C., and the state capital of Richmond. Norfolk/Virginia Beach was Places Rated Almanac’s #1 metropolitan area for recreation. Live and work in an environment abundant with history, culture, and education.

Applications are accepted electronically at: http://www.evms.edu/about_evms/administrative_offices/human_resources/jobs/. Please submit a cover letter outlining your background, purpose and interests; a CV; and names and contact information of three professional references. Direct inquiries to: Faculty Search Committee, Dr. Tina D. Cunningham CunninTD@EVMS.edu
