Faculty Position in General Epidemiology and Methodology

Department of Epidemiology

The Department of Epidemiology at the Johns Hopkins Bloomberg School of Public Health invites applications for a tenure-track Assistant/Associate Professor specializing in epidemiologic methods including but not limited to novel study designs, the intersection of epidemiology and non-genetic big data, and causal inference.

Applicants should have a doctorate in epidemiology or a closely related terminal degree. Physicians with graduate-level training in epidemiology are also encouraged to apply.

The candidate appointed to this position will have primary training in epidemiological methods. A content focus in HIV/AIDS, related infections, and co-morbidities, a focus in pediatric epidemiology (specifically pre-, peri-, postnatal outcomes, obesity, neurodevelopment, and lower and upper respiratory), and/or focus in environmental exposures is highly desired. We seek an early- to mid-stage investigator who could develop a collaborative and dynamic research portfolio. Key attributes include a strong track record of publication, willingness to work as part of an interdisciplinary research team across departmental tracks, experience in teaching core epidemiological methods, and methodological expertise.

The candidate must be committed to advising graduate students, mentoring post-doctoral fellows, and service to the Department and Johns Hopkins Bloomberg School of Public Health. Relevant publications, early career grant funding, and classroom teaching and mentoring experience is desirable. Experience in multidisciplinary collaboration is a plus.

The Department of Epidemiology is one of the oldest and largest departments of epidemiology in the world, with over 170 doctoral and master’s students and post-doctoral fellows and a diverse research program directed by 100+ faculty.

Interested applicants should send their curriculum vitae, statement of research interests and the names of three references by August 1, 2017 to:

David D. Celentano, ScD, MHS
Dr. Charles Armstrong Chair and Professor
Department of Epidemiology
Johns Hopkins Bloomberg School of Public Health
615 North Wolfe Street, Suite W6041
Baltimore, MD 21205 USA
or submit by email to: http://apply.interfolio.com/41700

Inquiries for further information should be directed to Dr. David Dowdy, Search Committee Chair, at ddowdy1@jhmi.edu. Links of interest for this position are http://www.jhsp.edu/departments/epidemiology/

The Johns Hopkins University is an equal opportunity/affirmative action employer committed to recruiting, supporting, and fostering a diverse community of outstanding faculty, staff, and students. All applicants who share this goal are encouraged to apply.
Faculty Position in Pharmacoepidemiology

Department of Epidemiology

The Department of Epidemiology at the Johns Hopkins Bloomberg School of Public Health invites applications for a tenure-track position as Assistant or Associate Professor with expertise in pharmacoepidemiology, including drug utilization, safety or comparative effectiveness research. Academic rank will be commensurate with experience.

The successful candidate will contribute to the Department’s expansion of research and educational initiatives in pharmacoepidemiology. The candidate will serve as core faculty in the Johns Hopkins Center for Drug Safety and Effectiveness which provides a nexus for individuals within the Schools of Medicine and Public Health who are committed to research, education, clinical programs and public service to improve prescription drug use and pharmaceutical policy in the United States and around the world. The candidate will be expected to develop an independent research agenda and establish collaboration with departmental faculty as well as social scientists and clinicians in an interdisciplinary setting.

Applicants should hold a doctoral degree in epidemiology, a related scientific discipline, or a clinical degree with graduate training in epidemiology or biostatistics. Applicants should also have demonstrated original scholarship in clinical, population or methodological research with an emphasis in pharmacoepidemiology, possess excellent written and communication skills as evidenced by peer-reviewed publications, teaching, and/or presentations at professional meetings, and demonstrate the potential to establish and maintain external research funding.

The Department of Epidemiology is one of the oldest and largest in the world, with over 170 doctoral and master’s students and a diverse research program directed by more than 100+ full-time faculty members. The Johns Hopkins Center for Drug Safety and Effectiveness was established in 2012 with a commitment to collaborative, transdisciplinary research with more than 30 affiliated faculty with a range of disciplinary expertise.

Interested applicants should send their curriculum vitae, research statement and the names of three references by August 1, 2017 to:

David D. Celentano, ScD, MHS
Dr. Charles Armstrong Chair and Professor
Department of Epidemiology
Johns Hopkins Bloomberg School of Public Health
615 N. Wolfe Street, Suite W6041
Baltimore, MD 21205 USA
or submit by email to: apply.interfolio.com/41258
