March, 2017

George Washington University Medical Faculty Associates has an opening in Washington, DC for a full-time statistician in the Biostatistics Core. This is a permanent position.

The focus of the work will be on clinical epidemiology and retrospective data analysis. The work will involve prediction modeling using specialized clinical databases including the National Surgical Quality Improvement Program (NSQIP), Vascular Quality Initiative (VQI), National Trauma Database (NTDB), VA Corporate Data Warehouse (CDW), and other databases. The statistician must be skilled in using SAS and other programming languages for manipulation of large databases. Experience using logistic regression and general linear models is required, and familiarity with R would be beneficial.

The candidate should have a Masters degree in Statistics or Public Health (with a focus in biostatistics) or a similar degree. At least two years of experience in data management and analysis would also be very helpful.

Please contact Richard L. Amdur, Ph.D., Lead Biostatistician, Medical Faculty Associates, for further information.
