The Henry M. Jackson Foundation for the Advancement of Military Medicine (HJF) announces the following career opportunity:

**Director, Data Coordinating and Analysis Center**

Supporting a Collaborative HIV and Infectious Diseases Award  
Job ID: 212789; hjf.org

The Director, Data Coordinating and Analysis Center (DCAC), will oversee a team that provides data collection, management, processing and analytic support to projects centered at the Walter Reed Army Institute of Research:

- **U.S. Military HIV Research Program (MHRP)**
- **Emerging Infectious Diseases Branch**

This includes research related to HIV, sexually transmitted infections, emerging pathogens, and other infectious diseases across an expanding international network with sites in:

- Kenya
- Uganda
- Tanzania
- Mozambique
- Nigeria
- Ghana
- Liberia
- Jordan
- Thailand
- Germany
- Brazil

Research include vaccine trials (preventive and therapeutic), investigational new drug trials, and observational cohort studies. This position offers a great opportunity to lead a team of programmers, data management specialists, and research analysts; influence modernization of practices for data management and analyses; and contribute to scientific analyses. Potential growth areas include development of an epidemiology/biostatistics core to support other initiatives.

**Minimum qualifications:** Ph.D. (biostatistics, epidemiology, or related field) or qualified M.D.; experience with cohorts, clinical trials, research databases, and personnel management; 6-10+ years of related experience
