Postdoctoral Research Fellow Position Digital Phenotyping / Smartphone Data Research

The Onnela Lab in the Department of Biostatistics at the Harvard T.H. Chan School of Public Health is seeking candidates with a Ph.D. in biostatistics, applied mathematics, computer science, or a related quantitative field for a two-year Postdoctoral Research Fellow position. This position involves developing statistical methods, data analytic tools, and mathematical models for analyzing smartphone data—collected with our high-throughput digital phenotyping platform—in biomedical research cohorts with the goal of establishing more precise and dynamic disease phenotypes.

Doctoral degree in biostatistics, computer science, applied mathematics, or a related quantitative field. Excellent programming skills, as well as strong oral communication and writing skills are required.
