Research Positions Available at the JHUSOM Division of Nephrology

Full-time research assistant opportunities are available starting in May/June 2020 with Dr. Chirag R. Parikh’s group in the Division of Nephrology at the Johns Hopkins School of Medicine. These positions involve data management, statistical programming and analyzing biomarker data from a variety of multicenter longitudinal studies involving kidney diseases, including the Kidney Precision Medicine Project (KPMP). Candidates will also be involved in all aspects of publications including data set preparation, implementation of analytic plans, report generation, and preparation of written and oral presentations. In addition to outstanding communication skills and a strong work ethic, an ideal candidate will have prior experience in data management or data analysis, preferably in SAS. This position is a great opportunity for graduating Master’s students and highly qualified undergraduate students with a strong background in statistics interested in obtaining applied statistical experience with exposure to clinical research.

The research group is composed of physicians, statisticians, research fellows, nurses, and study coordinators. Ongoing studies can be found at http://tribe.jhmi.edu/. Interested students should send a resume, cover letter, and transcript to rmalik9@jhu.edu with the subject line ‘Data Analyst Application’ by February 1, 2020.
