Dear Colleagues,

This e-mail is to inform interested individuals that the NICHD/National Children's Study is seeking a Statistician and a USAJOBS announcement for this position will be posted sometime in the near future. As you are likely well aware, the announcement will be open for a short period of time so please encourage interested individuals to get their CVs together so when the job is posted they are poised to apply.

The Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) of the National Institutes of Health will be posting a job-opportunity announcement for the position of Mathematical Statistician, GS-1529-14.

This position is located in the Program Office of the National Children’s Study (NCS). The NCS is a longitudinal observational study mandated by the US Congress to examine the effects of environmental and genetic influences on the health and development of about 100,000 children across the United States, following them from before birth until age 21. The goal of the NCS is to provide information that will lead to improvements in the health, development, and well-being children. The Study collects data on children and their family’s, through in-person visits and remotely, on factors that may influence health and development including physical, chemical, biological, genetics, and psychosocial. The incumbent provides statistical expertise and leadership for the design and analyses of the Study data including sample and protocol design, sample size and power calculations, weighting and bias analyses, methods of statistical analysis, monitoring of the data quality, and analysis of results.
