Associate or Full Professor Position in Clinical Trials: Division of Biostatistics, Department of Population Health, NYU School of Medicine

The Division of Biostatistics in the Department of Population Health at NYU School of Medicine advances scientific knowledge to benefit individual and population health by creating, disseminating, and implementing rigorous, innovative statistical methodologies across the entire spectrum of biomedical research. The Division is posed for a phase of dynamic growth, with a newly restructured doctoral program and rich opportunities for cross-institutional collaborations. The Department of Population Health (http://pophealth.med.nyu.edu/), founded in 2012, is a leader in the discovery and translation of new knowledge into policy and practice. Through its research, education, and service, the Department seeks to advance population health and health equity. Core areas of Department strength include healthful behavior change, early childhood health and development, comparative effectiveness and decision science, behavioral economics and health policy, community health improvement, healthcare delivery science, epidemiology, biostatistics, and medical ethics. NYU Langone Health is one of the nation’s premier academic medical centers. Our trifold mission to serve, teach, and discover is achieved daily through an integrated academic culture devoted to excellence in patient care, education, and research. We seek candidates for a senior faculty position focused on innovative clinical trial design, with preference for experience leading large-scale randomized trials and interest in complex cooperative projects.

Position qualifications: Candidates must possess an earned doctorate in biostatistics, statistics, or a related quantitative field. They should be established researchers with outstanding scholarship and a strong commitment to teaching. Candidates must demonstrate evidence of successful leadership of coordinating centers, core facilities, or other central trial-related resources, and show strong intellectual and organizational skills. Successful candidates will engage in both methodological and collaborative research with existing faculty at NYU School of Medicine and other Schools and Centers within NYU, have a commitment to team science, and possess outstanding oral and written communication skills. Candidates are also expected to have a track record of externally funded, independent research.

To apply: Please submit the following (addressed to Dr. Andrea Troxel, Director of Biostatistics)
http://apply.interfolio.com/46307

- Cover letter
- Curriculum vitae
- Statement of current and future research agenda

Application deadline: Review of applications will continue until the position is filled.

NYU Langone Health is an equal employment/affirmative action employer and does not discriminate on the basis of race, color, religion, gender, gender identity or expression, sexual orientation, marital/or parental status, age, national origin, citizenship, disability, veteran status, or any other classification protected by
