

**Postdoctoral Position: Division of Biostatistics, Department of Population Health, NYU School of Medicine, New York University**

We are seeking a postdoc for work on developing methodologies related to precision medicine.

**Company Information:** NYU Langone Medical Center is one of the world's preeminent academic medical centers and one of the nation's premier centers of excellence in health care, biomedical research, and medical education. The Department of Population Health of NYU School of Medicine was founded in 2012, and consists of core areas of biostatistics, epidemiology, healthful behavior change, comparative effectiveness and decision science, behavioral economics and health policy, and medical ethics.

**Duties and Responsibilities:** The Postdoctoral Fellow will engage in both methodology developments and collaborative research. Sample topics include but are not limited to research related to precision medicine, high-dimensional data, functional data analysis, disease classification. The Fellow will have opportunities in pursuing independent funding.

**Position Qualifications:** Applicants should have a Ph.D. in Statistics, Biostatistics, or other related field. Strong statistical knowledge and computational skills (e.g., proficient in R) are required. A successful candidate should have strong motivation and dependability.

**Salary Range:** Depending on qualification and experiences.

**Benefits:** Most Postdocs at the New York University School of Medicine are eligible to participate in a health insurance plan and housing plans. Please note that health insurance is also available for eligible dependents.

**Application deadline:** Open until filled. The position is available for up to two years.

Interested applicants please send a cover letter, cv, a research statement and a list of references to Thaddeus Tarpey at: [thaddeus.tarpey@nyulangone.org](mailto:thaddeus.tarpey@nyulangone.org)
