The Department of Psychology at the Ohio State University seeks a Ph.D. quantitative psychologist or scholar with related training to join our nationally recognized program in quantitative psychology. Ideally, the successful candidate will be a specialist in one or more of the following: psychometrics and psychological testing (e.g., measurement theories and test construction, reliability and precision of measurement, types of validity, test norming, test and item bias), statistical modeling of measurement-related research topics (e.g., item response theory, factor analysis, structural equation modeling), and/or development of methods for longitudinal and time-series models, with special interest in applications for data analytics, functional neuroimaging, and other cross-cutting areas. Faculty in the quantitative area contribute to the behavioral science methodology literature as well as make significant contributions in other substantive areas (neuroscience, cognitive, clinical, developmental, social and decision psychology, Intellectual Developmental Disabilities and educational testing). In addition, they contribute to the service mission of the quantitative psychology program by teaching required methodology and elective courses at both the graduate and undergraduate levels and by advising and consulting with graduate students and faculty within the psychology department and other departments across campus.

Qualifications:

Applicants must have earned a Ph.D. in psychology or a related field prior to the time of application. All applicants are expected to have very strong and fundable research programs and to contribute to both graduate and undergraduate supervision and instruction. Appointment is contingent on the university's verification of credentials and other information required by law and/or university policies, including but not limited to a criminal background check.

About Columbus:

The Ohio State University campus is located in Columbus, the capital city of Ohio. Columbus is the center of a rapidly growing and diverse metropolitan area with a population of over 1.5 million. The area offers a wide range of affordable housing, many cultural and recreational opportunities, excellent schools, and a strong economy based on government as well as service, transportation and technology industries (see http://liveworkplaycolumbus.com/). Columbus has consistently been rated as one of the Top U.S. cities for quality of life, and was selected as one of the Top 10 cities for African Americans to live, work, and play by Black Enterprise magazine. Additional information about the Columbus area is available at http://www.columbus.org.
Application Instructions:

Apply to Academic Jobs Online at: academicjobsonline.org/ajo/jobs7839. A complete application consists of a cover letter, curriculum vitae, statement of research and teaching interests, and the names of three individuals from whom letters of recommendation could be solicited. Applications received prior to November 15, 2016 will receive priority consideration. Inquiries may be directed to Shannon Maan (maan.3@osu.edu).

The Ohio State University is committed to establishing a culturally and intellectually diverse environment, encouraging all members of our learning community to reach their full potential. We are responsive to dual-career families and strongly promote work-life balance to support our community members through a suite of institutionalized policies. We are an NSF Advance Institution and a member of the Ohio/Western Pennsylvania/West Virginia Higher Education Recruitment Consortium (HERC).

The Ohio State University is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation or identity, national origin, disability status, or protected veteran status.
