Advancing the Science of Resilience
Call for Poster Abstracts

The Johns Hopkins PROMOTE (Promoting Resilience in Persons with Multiple Chronic Conditions) Center, the Older Americans Independence Center, and the SPRING study are hosting a dynamic half-day workshop on Advancing the Science of Resilience at Johns Hopkins University in Baltimore, Maryland. The purpose of the meeting is to bring together experts on distinct aspects of resilience (biological and physical, psychological/mental, community and family resilience) and to stimulate discussion on novel ways of synthesizing multiple aspects of resilience in research. The workshop will take place from 8:30 am-1:00 pm on October 4, 2019.

We are now accepting poster abstract submissions for our Advancing the Science of Resilience Poster Session! This event provides a stimulating opportunity for researchers to share their research on a range of topics relevant to resilience. Topics may include research on biological and physical, psychological/mental, or community and family resilience, supporting patients with multiple chronic conditions, frailty, as well as other factors affecting health and well-being (poverty, housing, access to food, traumatic life events). Poster presentations will held from 12:00-1:00 pm.

Please submit a 150-200 word abstract to PROMOTECenter@jhu.edu by September 20, 2019.

AGENDA

8:30-9:00 am  Registration, coffee, tea
9:00-9:45 am  Welcome, framing the day, and keynote
               Keynote presentation: What is resilience? Insights from other resilient systems such as coral reefs and engineering/computing resilience
9:45-9:55 am  Break
9:55-10:10 am Biological and physical resilience
10:10-10:25 am Psychological/Cognitive resilience
10:25-10:40 am Community and family resilience
10:45-11:30 am Panel discussion: Synthesizing across domains of resilience (biological, psychological, community, family)
12:00-1:00 pm Lunch & Poster Presentations

Please join us for a workshop on Advancing the Science of Resilience:
What can we learn from other resilient systems?
October 4, 2019
8:30 a.m.-1:00 p.m.
Welch Library, West Reading Room

Please join us for a stimulating day of presentations and discussion to better understand novel ways of synthesizing aspects of resilience (biological and physical, psychological/mental, community and family resilience) in research.

Attendees will develop a better understanding of the importance of incorporating multiple aspects of resilience and novel ways of synthesizing aspects of resilience (biological and physical, psychological/mental, community and family resilience) in their own research.

Please RSVP for this event here.
