Management Consulting Analytics Senior Associate

PwC/LoS Overview:
Are you interested in the opportunity to work for an industry-leading firm that services clients that include the Fortune 500, and will give you the experience and exposure you need to build your career and personal brand? If you are, then PricewaterhouseCoopers LLP (www.pwc.com/us) is the firm for you. PricewaterhouseCoopers LLP (PwC US) helps clients meet the challenges and opportunities of the US marketplace in the areas of assurance, tax, and advisory. We offer the advantage of being part of a global network of firms combined with detailed knowledge of local, state and US national issues. More than 169,000 people in over 158 countries across the PwC network are committed to deliver quality in assurance, tax and advisory services. People across the PwC network share knowledge, experience and solutions to develop fresh perspectives and deliver practical advice.

At PwC US, you will be part of a learning culture, where teamwork and collaboration are encouraged, excellence is rewarded, and diversity is respected and valued. We offer a flexible career progression model that allows for a variety of challenging opportunities throughout your career. We provide unparalleled coaching, mentoring, and career development programs; global opportunities; and state of the art technology-driven methodologies to help you provide quality service to our clients.

From strategy through execution, PwC Advisory helps clients build their next competitive advantage. As the world's second largest global consulting provider, we combine the breadth of knowledge of over 35,000 global professionals with deep industry knowledge to deliver custom solutions for our clients. A long history of working with many of the world's largest and most complex companies means we really understand the unique business challenges our clients face better than most consultancies.

Job Description:
Our Strategy consultants help clients optimize their business. This high performing team helps with strategy growth and development, strategy transformation, analytics and strategic decision making, M&A strategy, and commercial and market due diligence.

Position/Program Requirements:
Knowledge Preferred:

Demonstrates thorough knowledge of, and proven success with a role, executing various aspects of the business or information technology-related client engagements and/or projects within a professional services environment, including knowledge of an industry or functional domain and expertise in at least two of the following areas:
- Statistical Analysis and Techniques
- Customer, Product and Pricing Analysis
- Business and Operations Analysis within marketing, operations, or risk analysis using quantitative techniques
Demonstrates significant experience working with analytical models or techniques and the ability to apply such methods to an applicable challenge within the larger field of expertise. This background should include:
- Visualization techniques and tools
- Advanced analytics techniques (regression, simulation, etc)
- Applicable sources of external, internal or new data sources to support analytic methods and visualization techniques
- Healthcare, Insurance, Financial Services, Customer and Industrial Products and Services, Manufacturing or Telecom Industries

Skills Preferred:

Demonstrates thorough skills and/or proven success in a role participating in consulting-related projects within a professional services environment that utilize creative thinking skills and individual initiative, including the following:
- Analyzing large and complex data sets, including a demonstrated thorough aptitude for conducting quantitative and qualitative analyses
- Collaborating and contributing as a team member: understanding personal and team roles, contributing to a positive working environment by building solid relationships with team members, proactively seeking guidance, clarification and feedback
- Identifying and addressing client needs, building relationships with clients, developing requests for information, demonstrating flexibility in prioritizing and completing tasks, communicating potential conflicts to a supervisor
- Prioritizing and handling multiple tasks, researching and analyzing pertinent client, industry and technical matters, utilizing problem-solving skills, and communicating effectively in written and verbal formats to various audiences (including various levels of management and external clients) in a professional business environment
- Coaching and collaborating with associates who assist with this work, including providing coaching, feedback and guidance on work performance
- Understanding how the application of analytical techniques correlated to business value
- Being able to select the appropriate analytical techniques for the problem at hand

Demonstrates flexibility and willingness to travel, as client assignments require
