One postdoc position at the University of Pennsylvania, supported by the NIH "Ophthalmic Statistical Genetics and Bioinformatics Training Program" funded by the National Eye Institute. Earliest starting date: May 1, 2014. Focus on statistical genetics methods research and collaborative research in genetics of ophthalmic phenotypes.

Applications from minority students are encouraged. Post-doctoral applicants should have a doctoral degree in statistics/biostatistics, computational biology, ophthalmology/genetic epidemiology or a related field. Eligibility for the training grant includes U.S. citizens, non-citizen nationals, and permanent residents. The program will support post-doctoral students with a stipend. Any questions can be sent by e-mail to hongzhe@upenn.edu.
