***** FACULTY POSITION *****

Assistant/Associate Professor - SUNY Empire Innovation
Department of Environmental Health Sciences

Position Open as of September 1, 2019

The Environmental Health Sciences Department (EHS) in the University at Albany (UAlbany) School of Public Health (SPH), State University of New York (SUNY) invites applications for an Assistant/Associate Professor of Empire Innovation to begin in the Fall of 2019.

The successful candidate should have expertise in advanced or innovative methods in Environmental or Occupational health modeling, especially the modeling of mixtures; exposure assessment; clean energy and environmental sustainability; translational science; big data and data analytics; or a related field.

The SUNY Empire Innovation Program (EIP) is a state-funded program dedicated to recruiting and retaining world-class faculty at the State University of New York. EIP faculty are leaders in their fields who have an established track record of scholarly achievement, external funding, and collaborative research. EIP faculty positions are highly competitive as they hold a SUNY-wide title of distinction.

Accredited by the Council on Education for Public Health (CEPH) and known for our outstanding teaching and research, The University at Albany School of Public Health was founded in 1985 as a unique partnership between the University at Albany and the New York State Department of Health, whose scientists hold faculty appointments in the School, and team up with UAlbany professors to teach and mentor students and conduct research.

The world-class faculty in the EHS department is engaged in a broad range of laboratory and field-based environmental health scientific research across the fields of toxicology, environmental chemistry, microbiology, engineering, global health and epidemiology. The Department is closely associated with the Center for Environmental Health (CEH) and the Wadsworth Center, both of which are part of the New York State Department of Health (DOH), the largest and most comprehensive department of health in the nation. CEH uses scientific expertise and application of regulatory programs to protect New Yorkers from environmental hazards, and the Wadsworth Center is the research-intensive laboratory of the DOH. The Department of Environmental Health Sciences offers doctoral (Ph.D. and Dr.P.H.) and master’s degrees (M.S. and M.P.H), and is actively engaged with UAlbany's undergraduate B.S. program in Public Health.

A successful candidate will be expected to
• Teach at the graduate and undergraduate levels.
• Serve as advisor and mentor to culturally diverse students and postdoctoral fellows in research.
• Develop independent extramurally funded research and be able to collaborate with colleagues in the School of Public Health, in other parts of the University, or with the New York State Department of Health.

A successful candidate will

• Hold a Ph.D. in environmental science, exposure science, epidemiology, biostatistics, or a related field.
• Have at least 3-5 years of research experience after completion of the terminal degree
• Have evidence of successful teaching at the graduate or undergraduate levels.
• Have a strong record of scholarship such as peer-reviewed publications and externally funded research as the principal investigator.

The University at Albany is committed to building a culturally diverse faculty and strongly encourages applications from female and minority candidates.

The Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, or Clery Act, mandates that all Title IV institutions, without exception, prepare, publish and distribute an Annual Security Report. This report consists of two basic parts: disclosure of the University's crime statistics for the past three years; and disclosures regarding the University's current campus security policies. The University at Albany's Annual Security Report is available in PDF format by clicking this link http://police.albany.edu/ASR.shtml.

**THE UNIVERSITY AT ALBANY IS AN EO/AA/IRCA/ADA EMPLOYER**

Applications submitted by **March 31, 2019** will be considered in the first round of review. Applications will be accepted until the position is filled.
