RE: Biostatistical Analysis and Data Management Positions Available

Dear Dr. Diener-West,

I am writing to you regarding several open positions in the Department of Surgery at the University of Virginia.

We are seeking to hire one or more biostatisticians to collaborate with and support faculty members in the Department in designing and implementing data-based research studies, preparing study results for presentation, publication and reporting as well as preparing aspects of applications for external research funding. These positions will involve the use of a variety of data sources, including prospectively collected data, retrospective data at the institutional level, as well as large administrative data sets. The work will entail aspects of data management, study design and data analysis across a wide variety of study questions. Individuals in these positions will interface with faculty members, research fellows, surgical residents and trainees on a regular basis. Opportunities for participation in the publication process will be available.

Qualified applicants must have a Master's degree in a related discipline (e.g. Biostatistics, Epidemiology, Statistics, Public Health, etc.) and one to two years of health services / outcomes research-related experience. Individuals with a Doctoral degree in a related discipline with appropriate experience will be considered as well.

Please have any interested individuals contact me at the above email address and feel free to share or post this letter.

Thank you very much.

Best regards,

A handwritten signature in black ink, appearing to be "EBS", written over a horizontal line.

Eric B. Schneider, PhD
