Lessons and Strategies for a Career in Academia

Friday, December 14, 2018
10:00 a.m. - 12:00 p.m. Eastern

Must register before December 13

Presenters:
Dr. Leslie McLure
Professor & Chair, Department of Epidemiology and Biostatistics
Dornsife School of Public Health at Drexel University

Dr. Elizabeth Stuart
Associate Dean for Education
Professor of Biostatistics, Mental Health and Health Policy and Management
Johns Hopkins Bloomberg School of Public Health

As a Biostatistician, there are many paths to a successful career. Each has benefits and drawbacks and will depend on an individual's own skills and preferences. In this webinar, Drs. Elizabeth Stuart and Leslie McClure will host a conversation about their academic careers, including providing some strategies for success and describing some of the challenges they’ve faced. They’ll consider important questions, such as: What to look for in a job? How to develop meaningful collaborations (and get out of those that are not productive)? How to prioritize activities with an eye towards promotion (e.g., collaborative and methodological projects)? How to balance teaching, research, and grant requirements? And how to balance all of that with things outside of work? However, the exact direction of the conversation will depend on the questions and engagement from webinar participants.
