

Organization Name: Alcon

Locations: Fort Worth, TX and Atlanta, GA

Number of positions: 2 (1 Principal Statistician; 1 Senior Principal Statistician)

Alcon is the largest eye care device company in the world. We operate in the ophthalmic surgical and vision care markets, which are large, dynamic and growing. We are dedicated to helping people see brilliantly. We have a strong foundation based on our trusted brand, a legacy of industry firsts and advancements, leading positions in the markets in which we operate and a continued commitment to substantial investment in innovation.

Brief description of work:

- Supports project teams through contributions to product development strategies and the design, planning, execution, analysis, and reporting of clinical and non-clinical studies, with a view toward establishing the conditions essential for determining safety, efficacy and marketability.
- Scientific and technical leadership and management of multiple projects in one or more therapeutic areas.
- Must exhibit ability to independently assist in creation of development plans and lead scientific development of all related protocols for multiple projects.
- Independently lead all efforts related to project-level activities, to include all analyses and inputs into regulatory filings for all phases of development.
- Ensure and manage quality, timeliness, and efficiency for all support and deliverables for designated projects.
- Liaise with and provide needed guidance to statistical programmers assigned in support of project and trial deliverables.
- Includes the accountabilities of statisticians assigned to projects.
- Establish and maintain working relationships with project-specific functional representation.

Minimum requirements:

MS or PhD in Statistics or related field (e.g., Biostatistics)

5+ years of experience in the pharmaceutical and/or medical device space

Fluent English essential (oral/written)
