POSITION:  RESEARCH BIOSTATISTICIAN

Department:  Healthcare Policy and Research  FLSA Status: Exempt
Incumbent:  New Position  Biostatistics Service Core
Edited by:  Clarissa Crabtree  Reports to: Lisa Kern, MD, MPH
Reviewed by:      Date posted: March 2015
Hours worked: 35

I.  POSITION SUMMARY

Under faculty supervision within the Department of Healthcare Policy and Research of Weill Medical College of Cornell University, the candidate will perform statistical activities.

II.  POSITION ACTIVITIES

Performs short-term and long-term biostatistical consultations for investigators.

Analyzes research data, including performing basic and advanced statistical analyses and interpret/translate results for non-statistical investigators.

Prepare reports, methods sections, and analysis plans for incorporation into abstracts, manuscripts, and grants.

Assist in database design/programming and database management.

Perform analyses using SAS, SPSS, and Stata and have working knowledge of data management software such as Microsoft Excel and Microsoft Access.

Contribute to teaching biostatistical methodology to medical students, residents, fellows, and other staff.

Performs other related duties as assigned.
III. MINIMUM REQUIREMENTS

The successful candidate must possess at minimum a Master’s degree in biostatistics or statistics, or related field. At least 1-2 years of biostatistical consulting experience, either within the academic curriculum or in a clinical research environment, is preferred.

The successful candidate should possess good organizational skills, time management skills, and the ability to manage several concurrent tasks. Excellent oral and written communication skills are essential.
