The Urban Health Collaborative at the Drexel University Dornsife School of Public Health is seeking a Project Manager and a Statistician/Data manager for a new project on urban health in Latin America.

PROJECT MANAGER, LATIN AMERICAN CITIES PROJECT

We are seeking a full-time Project Manager, Latin American Cities Project to oversee the management and coordination of a large, multisite, international urban health research project involving several institutions across the United States and several countries in Latin America. Key aims of the project are (1) to study the links between urban environments and health using a newly created longitudinal database; (2) to conduct policy evaluation in partnership with stake holders; (3) to use systems approaches to evaluate potential policy impacts; and (4) to conduct dissemination and outreach to scientists, the public and policy makers.

The project is based at the Urban Health Collaborative at the Dornsife School of Public Health and directed by Ana V. Diez Roux. The Project Manager, Latin American Cities Project will work closely with the study Principal Investigator to oversee the coordination of all administrative, scientific, and outreach aspects of the project. For additional details or to apply see www.drexeljobs.com, Requisition Number 7988, Department Number 6915 – SPH Urban Health Institute. Interested applicants may also contact Ana Diez Roux avd37@drexel.edu for more information.

STATISTICIAN/DATA MANAGER

for large multisite project on urban health in Latin America

We are seeking a Statistician to oversee data and analytical aspects of a large, multisite, international urban health research project involving several institutions across the United States and several countries in Latin America. Key aims of the project are (1) to study the links between urban environments and health using a newly created longitudinal database; (2) to conduct policy evaluation in partnership with stake holders; (3) to use systems approaches to evaluate potential policy impacts; and (4) to conduct dissemination and outreach to scientists, the public and policy makers.

The project is based at the Urban Health Collaborative at the Dornsife School of Public Health and directed by Ana V. Diez Roux. The Statistician will work closely with the study investigators and the Project Manager, Latin American Cities Project to oversee all data and analytical aspects of the project. For additional details or to apply see www.drexeljobs.com, Requisition Number 8010, Department Number 6915 – SPH Urban Health Institute. Interested applicants may also contact Ana V. Diez Roux avd37@drexel.edu for more information.
