The University of Haifa Department of Statistics, one of Israel’s leading centers for research and training in statistical science, is seeking a postdoctoral fellow to be mentored by Prof. Philip Reiss (https://works.bepress.com/phil_reiss/).

The fellowship will entail methodological work in high-dimensional and functional data analysis and semiparametric regression, as well as collaborative projects involving complex data sets from psychological studies, including analysis of experience sampling and neuroimaging data. The position is for one year, renewable for a second year.

Candidates must hold, or be very close to completing, a PhD or equivalent degree in statistics or biostatistics. Facility with R programming and strong communication skills are required.

To apply, please send a CV, statement of research interests, and contact information for three references to Prof. Reiss (reiss@stat.haifa.ac.il).
