The Department of Biostatistics at the Harvard T.H. Chan School of Public Health seeks outstanding candidates to fill two tenure-track positions at the assistant or associate professor level. We seek candidates with a strong background in statistical theory and methodology, demonstrated expertise in development of new biostatistical methods, and an interest in collaborative research in public health and biomedical science. Candidates should have the potential to become leaders in the development and application of statistical methods in health sciences and should also be enthusiastic about teaching, training, and mentorship through our graduate programs. Responsibilities will include methodological and collaborative research, teaching, and supervision of graduate students. Candidates are required to have a doctorate by the time the appointment begins, and academic rank will be determined in accordance with the successful candidate’s experience and accomplishments. The Department of Biostatistics offers an exceptional environment to pursue research and education in statistical methods while being at the forefront of efforts to benefit the health of populations worldwide. Our faculty are leaders in the development of statistical methods for the design and analysis of clinical trials and observational studies, missing data, causal inference, precision health, network analysis, statistical genetics and genomics, neurostatistics, and environmental statistics. Our innovative approaches to computational biology, quantitative genomics, and the analysis of massive health-related data are strengthened by a deep foundation in theory and application. Our unique community provides unparalleled collaborative opportunities with academic departments across Harvard, the Dana-Farber Cancer Institute, and other world-class Harvard affiliated hospitals.
