Trio Health collects and analyzes real world evidence to improve the quality of health care available to all patients.

Trio Health’s mission is to provide unbiased and evidence-based insight to improve awareness, access, advocacy, and, most importantly, optimal care for the patient. If the patient wins, all stakeholders will achieve clinical and commercial success.

**LEAD BIOSTATISTICIAN**

We are looking for a lead biostatistician whose interests are in clinical and health science, broadly construed, and including researchers with both a methodological and applications focus. Applicants must be intellectually curious researchers and are self-motivated. Applicants should have demonstrated a capacity for independent work and will be expected to engage as a key member of the analytics team and participate in activities in multiple specialty therapeutic disease areas. We recognize that strength comes through diversity and actively seek and welcome people with diverse backgrounds, experiences, and identities.

**Responsibilities include:**

- Providing lead input on the study design and analysis plan for protocols
- Ensuring rigorous approaches are taken, appropriate statistical methods utilized, and documenting approaches for internal knowledge/education
- Conducting statistical analyses in collaboration with other members of the Analytics team
- Preparing organized and clear summaries of analyses results
- Writing statistical methods sections for reports and manuscripts
- Results focused, committed to strategic thinking to drive improvement of Trio Health Analytics team and overall company growth

**To qualify, the candidate must have:**

- Master's degree or PhD. in biostatistics, statistics, epidemiology or a closely related quantitative field
- 1-5 years of experience in a research setting preferred.
- Proficiency in a statistical programming package such as SAS, SPSS, R, Python, Stata or other comparable software
- Strong skills in data analysis and the effective presentation of results
- Excellent oral and written communication skills.
Required application documents include: a CV, cover letter and up to two representative examples of work. Also, names and contact information for at least two and up to five references

All materials should be submitted as Microsoft Word or PDF documents.
