

Monthly Program Status Report – PROJECT

| | |
|-----------------------------------|---|
| Reporting Period: | February 2017 |
| Contracting Agency: | Food and Drug Administration (FDA) |
| FDA Project Manager: | Shaila Shaheed, Shaila.Shaheed@fda.hhs.gov , Thomas Permutt, thomas.permutt@fda.hhs.gov , |
| FDA Subject Matter Expert: | Thomas Permutt, thomas.permutt@fda.hhs.gov , 301-796-1271 |
| FDA COTR: | Shaila Shaheed, Shaila.Shaheed@fda.hhs.gov , |
| Contract / Order: | HHSF223201310230C |
| Contractor PI: | Daniel Scharfstein, dscharf@jhu.edu , 410-955-2420 |
| Project Team: | Aidan McDermott (Computer Programmer) |
| Description of Activity: | A recent FDA-sponsored National Research Council Report recommended that "examining sensitivity to the assumptions about the missing data mechanism should be a mandatory component of reporting." While the Report outlines a framework for conducting sensitivity analysis, there are two major problems with existing methods: (1) they have not been implemented in software packages and (2) they do not adequately address non-monotone missing data patterns (i.e., patients provide data irregularly). The objective of this project is to address these gaps by: 1) creating unified and coherent methods for global sensitivity analysis of clinical trials with monotone and non-monotone missing data, 2) developing free, open source and reproducible software in SAS and R to implement the methods, and 3) demonstrating the methods and software using real clinical trial data. |

| Project Health Check | | | | | | |

| Notes ▶ | Within Budget | On Schedule | Adequate | On Target | | |

| Budget Tracking – (TOTAL CONTRACT CEILING) | | | | | | | |
|---|-------------------|--------------------|-----------------------|---|------------------------|----------------|--|
| POP | Ceiling Remaining | Cumulative Funding | Year Funding (Year 1) | Spent to Date | Year Funding Remaining | Month Invoice | Funding Covers |
| Base | \$1,094,565 | \$1,094,565 | \$1,094,565 | \$1,055,905.46 (\$20,466.79 committed) | \$38,659.54 | \$1,027,522.83 | Salary, fringe, other expenses, and indirect costs |

| Activity Summary and Highlights |
|--|
| <i>Biometrics</i> manuscript was accepted subject to reducing its length. We worked the book. We continued to revise the software package. |

| Key Accomplishments | |
|---|---|
| Current Reporting Period | Planned for Next Period |
| <ul style="list-style-type: none"> Worked on book about the methods and software Updated SAMON to handle more flexible exponential tilting functions. | <ul style="list-style-type: none"> Reduce length of Biometrics manuscript Complete case study section of book Submit <i>Clinical Trials</i> manuscript Continue development of new version of SAMON |

| Issues and Risks | | | | | |
|---------------------|----------|--------|---------|--|--|
| Category | Priority | Status | Opened | Issue | Description |
| Contract (FDA) | 1 | Closed | 9/30/13 | Intellectual Property | Revision to contract regarding intellectual property language. |
| Dissemination (FDA) | 2 | Closed | 2/15/14 | Website | FDA Personnel cannot connect to www.missingdatamatters.org from their office computers. |
| Software (JHU) | 1 | Closed | 3/15/14 | Coverage of Confidence Intervals | Simulations indicate that standard procedures for constructing confidence intervals are not providing adequate coverage with typical sample sizes. |
| Computing (JHU) | 1 | Closed | 4/21/14 | Periods of slow performance of computing cluster | A new computing cluster was installed at Johns Hopkins. We are experiencing periods of slow performance on the cluster. |
| Personnel (JHU) | 1 | Closed | 5/21/14 | Re-Distribution of Effort | Starting April 1, Aidan McDermott has reduced his percent effort by 20%. Chenguang Wang joined the project starting July 15. |
| Invoicing (FDA) | 1 | Closed | 6/6/14 | Payment of Invoices | Invoices have not been paid. |
| Computing (FDA) | 1 | Closed | 6/6/14 | Software on FDA Cluster | Investigate the steps needed to run software on FDA cluster |
| Personnel (JHU) | 1 | Closed | 1/13/15 | New Effort | Yi Lu joined the project to work on confidence intervals. |
| Software (JHU) | 1 | Closed | 6/15/16 | Coverage of Confidence Intervals | Simulations indicate that standard procedures for constructing confidence intervals are not providing adequate coverage with typical sample sizes. |
| Funding | 1 | Closed | 9/15/16 | No Cost Extension | There will approximately \$125,000 of unspent by the end of the project period. |
| Funding | 1 | Open | 1/18/17 | No Cost Extension | Aidan McDermott will not be able to draw funds during February and March. We request that these funds be paid in May and June, instead. |
| Short Course | 1 | Open | 1/18/17 | Short course | Scheduling a date in April, May or June |

| Other Activities |
|------------------|
| |

| Attachments and References |
|----------------------------|
| |

| Deliverable | Due Dates (Revised) |
|--|--------------------------|
| Allow SAMON to handle negative and non-integer values | New Release on 6/30/2017 |
| Allow SAMON to handle missing values coded as NA | |
| Change the syntax in SAMON so the dropout model parameters are denoted by H instead of P and the outcome model parameters are denoted by F instead of Q. | |
| Change SAMON to output confidence intervals of levels other than 95% | |
| Allow SAMON to handle more flexible exponential tilting functions | |
| Revise <i>Biometrics</i> manuscript to address reviewer comments. | 1/31/17 |
| Submit SAMON case study manuscript to <i>Clinical Trials</i> or <i>Statistics in Medicine</i> . | 3/31/17 |
| Submit manuscript that describes the partial imputation procedure for handling missing data prior to drop-out. | 6/30/17 |

Yellow items are completed.
