

We are looking for talented, masters or PhD level trained individuals that are enthusiastic about working side-by-side with diverse stakeholders and leaders to improve health outcomes for pediatric and adult populations through applied statistical methods. We work with health systems, patients & families, and clinical leaders across the country to drive quality improvement and population health improvement through our [Learning Health Network model](#).

Open positions are:

[Lead Analyst \(Manager\) Position](#)

[Senior Analyst Position](#)

[Analyst II Position](#)

[Analyst II Position](#)

The portfolio of our work covers topics/public health problems including but not limited to:

- Chronic Disease
- Health Disparities
- Quality of Life
- Risk-adjusted mortality
- Community Health
- Sustained Remission

I'm happy to have informal interviews with anyone interested to give them a better sense of the role/work if needed.

Regards,

Matt
