

I lead clinical research in the Department of Surgery at Westchester Medical Center (WMC). WMC is a busy tertiary care center, is home to a Level I Trauma Center, and is closely affiliated with New York Medical College. WMC began as a military hospital in 1917, then became a public hospital and recently transformed into the hub of the WMC Health Network, a group of 11 facilities in the Hudson Valley of New York State. WMC and its affiliates serve urban, suburban and rural areas and it is located 25 miles from New York City's Central Park.

We are seeking a Statistician. This individual would have strengths in statistical techniques, clinical research design and research methods. The person we hire may apply for a faculty appointment at New York Medical College. We offer a competitive salary and generous benefits.

We are particularly interested in those who have completed masters level training in your program(s):

MHS Biostatistics  
ScM Biostatistics  
ScM Biostatistics

Please share the announcement below with recent graduates and alumnae of your institution. Also, please feel free to share this message Job Summary with division/department heads and other faculty.

Please direct inquiries to my email address. Alternatively, applicants may go this this website: <https://wmchealthjobs.org/search-jobs/?icid=internal:wmctargettest:continuesearch:na:na:na/>

... and enter the phrase, Statistician, in the Keyword box.

Thank you so much for assisting us in finding a talented individual to fill this position.

Take care.

Sincerely,

David J. Samson, MS  
Associate Director  
Department of Surgery Clinical Research Unit (DSCRU)  
Westchester Medical Center
