

New Postdoctoral Position at Cornell University's Weill Medical College

The Division of Biostatistics within the Department of Population Health Sciences at Weill Cornell Medicine is looking for an outstanding candidate for a postdoctoral position in biostatistics. The postdoctoral researcher will work under the direct supervision of [Samprit Banerjee](#), PhD, who is an associate professor of population health sciences in the Division of Biostatistics. This position will involve a healthy mixture of methodological and collaborative research in biostatistics. Methodological research may include, but is not limited to, machine learning methods, especially for correlated outcomes, time-to-event modeling, and multivariate statistics. Collaborative research may include, but is not limited to, mHealth (smartphone and wearables) studies, observational studies involving "big" administrative data (electronic health records, health insurance claims), and clinical trials in mental health and COVID-19 research. This position will require preparation of statistical/biostatistical manuscripts, assistance in preparation of biomedical/clinical manuscripts, preparation of relevant statistical software packages, and other academic activities.

Position Qualifications: The ideal candidate should have a PhD in statistics, biostatistics, or a closely related field and will be knowledgeable in machine learning methods. Candidate must also have ability to engage in independent thinking, be diligent and meticulous in their attitude towards work, possess excellent written and verbal communication skills, and be collegial in their interaction. The candidate must demonstrate scholarship through published or under-review manuscripts and demonstrate independent ability to write manuscripts.

Application: To apply, please email (1) a brief cover letter describing current and future research, (2) recent C.V., (3) a sample of independently writing, and (4) three reference letters to Dr. Samprit Banerjee (sab2028@med.cornell.edu).

Company Information: Founded in 1898, and affiliated with what is now NewYork-Presbyterian Hospital since 1927, Weill Cornell Medicine is among the top-ranked clinical and medical research centers in the country. In addition to offering degrees in medicine, Weill Cornell Medicine also has PhD programs in biomedical research and education. Along with neighboring Sloan Kettering Institute and The Rockefeller University, the institution has established a joint MD-PhD program for students to intensify their pursuit of Weill Cornell's triple mission of education, research, and patient care. Weill Cornell Medicine is divided into 24 basic science and patient care departments that focus on the sciences underlying clinical medicine and/or encompass the study, treatment, and prevention of human diseases.

Diversity is one of Weill Cornell Medicine's core values and is essential to achieving excellence in patient care, research, and education. We welcome applications from candidates who share our commitment to fostering a culture of fairness, equity, and belonging. Weill Cornell Medicine is an Equal Employment Opportunity Employer, providing equal employment opportunities to all qualified applicants without regard to race, sex, sexual orientation, gender identity, national origin, color, age, religion, protected veteran or disability status, or genetic information.
