

I work as a lead biostatistician on the data science team here at [Evidation Health](#), a digital health startup. We're now hiring for the following positions (<https://evidation.com/careers>):

- Health Data Scientist: <https://boards.greenhouse.io/evidation/jobs/5196082002>
- Product Data Scientist: <https://boards.greenhouse.io/evidation/jobs/5205114002>
- Research Scientist (health behavior): <https://boards.greenhouse.io/evidation/jobs/5233863002>
- Senior Research Scientist (health behavior): <https://boards.greenhouse.io/evidation/jobs/5233888002>

Please feel free to circulate widely, and do send interested applicants my way with questions.

About Evidation:

Evidation's mission is to empower everyone to participate in better health outcomes. Evidation measures health in everyday life and enables anyone to participate in ground-breaking research and health programs. Built upon a foundation of user privacy and control over permissioned health data, Evidation's Achievement platform is trusted by millions of individuals—generating data with unprecedented speed, scale, and rigor. We partner with leading life sciences and healthcare companies to understand health and disease outside the clinic walls.

Best,

Dr. Eric J. Daza
