

Position Available

Masters BIOSTATISTICIAN

Biostatistics Unit – Feinstein Institutes for Medical Research

In Partnership with the Department of Occupational Medicine, Epidemiology, and Prevention

Our growing research program requires a Masters biostatistician to work on a wide variety of epidemiologic and clinical research projects. Studies involve data from large epidemiologic cohorts, surveys, large national databases, and electronic medical records. Analyses may include multilevel structures, time to event data, causal inference, and machine learning methods. Responsibilities include: consulting, data analysis, scientific writing, teaching, collaboration, and methods research.

Requires Masters in biostatistics, statistics or equivalent. 3+ years relevant experience. Application and methodological responsibilities may include: occupational epidemiology, social behavioral sciences, cancer, multilevel modeling, survival analysis and/or causal inference. Experience with NIH grants is a plus. Excellent oral and written communication skills. Ability to work remotely from home. Good sense of humor.

Our group includes 16 statisticians and is based at the Feinstein Institutes for Medical Research, Great Neck, NY - the research component of Northwell Health.

PhD BIOSTATISTICIAN

****Expertise in Causal Inference & Adaptive Trials****

Biostatistics Unit – Feinstein Institutes for Medical Research

In Partnership with The Center for Health Innovations and Outcomes Research

Our growing research program requires a PhD biostatistician to work on a wide variety of clinical research projects. Studies involve comparative effectiveness, medical decision models, large data set analysis, causal inference, meta-analysis, prediction models, clinical trials, and clinical epidemiology. Responsibilities include: consulting, teaching, collaboration, and methods research.

Requires PhD in biostatistics, statistics, or equivalent. 3+ years relevant experience. Expertise in causal inference and modern clinical trials design preferred. Experience working on and writing NIH grants. Excellent oral and written communication skills. Ability to work remotely from home. Good sense of humor.

Our group includes 16 statisticians and is based at the Feinstein Institutes for Medical Research, Great Neck, NY - the research component of Northwell Health.
