

The Statistics Department at the University of Connecticut has just opened up two new Faculty positions. We kindly ask for your support and assistance in spreading the word to those you know who may be interested in either of these positions. Highlights of each of the jobs can be found below in addition to the link to the full job description.

Assistant Professor in Data Science – Storrs, CT

<https://academicjobsonline.org/ajo/jobs/19337>

The Department of Statistics at the University of Connecticut invites applications for a tenure-track position at the level of Assistant Professor in the area of Data Science. The Department is a highly active center of research, education, and service with regional, national, and international prestige. It is a founding member of the New England Statistical Society, for which it houses the administration.

The successful candidate will be expected to contribute to research and scholarship through extramural funding, high-quality publications, impact as measured through citations, and national recognition such as honorific awards. The successful candidate will share a deep commitment to effective instruction at the undergraduate and graduate levels, innovative courses and instruction methods, and mentoring of students in research, outreach, and professional development and contributing to the development of data science. Successful candidates will also be expected to broaden participation among members of under-represented groups; demonstrate through research, teaching, and/or public engagement the commitment to, and support of, diversity in the learning experience; integrate multicultural experiences into instructional methods and research tools; and provide leadership in developing pedagogical techniques designed to meet the needs of diverse learning styles and intellectual interests.

Assistant Professor In Residence – Stamford, CT

<https://academicjobsonline.org/ajo/jobs/19417>

The Department of Statistics at the University of Connecticut invites applications for a non-tenure track position at the level of Assistant Professor in Residence. The position is suitable for candidates who wish to pursue an academic career with an emphasis on teaching and continued growth in that direction. Normal duties include a teaching load of 21 credit hours of instruction per year or the equivalent. The successful candidate may be required to undertake significant tutoring responsibility or other administrative duties with a commensurate reduction in the teaching load.

The successful candidate will have exceptional communication skills and a strong commitment to instruction, advising, and mentoring. The incumbent will teach introductory statistics courses.
