

The Yale/Yale New Haven Hospital Center for Outcomes Research and Evaluation (CORE) is a leading national outcomes research center dedicated to transforming healthcare for the betterment of people and society by leveraging data, analytics, and technology. For more information on CORE, please visit our website: www.medicine.yale.edu/core

We are actively recruiting qualified data analysts and statisticians for multiple openings with our Data Management and Analytics team at CORE.

All data analysts and statisticians work under the direction of the Director of Data Management and Analytics at CORE to provide comprehensive statistical support for quality of care and outcomes research studies. Applicants should have strong analytical and communication skills, and experience working with clinical or health care data.

Interested applicants should have a Master or PhD in Biostatistics, Statistics or relevant field, and at least 1-4 years of experience, or equivalent combination of education and experience depending on the position. Applicants should also have experience with generalized linear, generalized linear mixed, survival, and Bayesian models and/or machine learning methods, advanced knowledge and related work experience utilizing statistical programming such as SAS, R and Python, and a strong ability to communicate technical ideas and results to non-technical customers in written and verbal formats.
