Thomas A. Louis (PhD in Mathematical Statistics, Columbia University; BA in Mathematics, Dartmouth College) is Professor Emeritus of Biostatistics, Johns Hopkins Bloomberg School of Public Health, and Expert Statistical Consultant to the Center for Drug Evaluation and Research at the FDA via an Interagency Personnel Agreement (IPA) with Hopkins. From 2013-2015 he served as Associate Director for Research & Methodology and Chief Scientist at the U.S. Census Bureau, via an IPA. Previous employment included Assistant Professor of Mathematics at Boston University; Associate Professor of Biostatistics at the Harvard School of Public Health; Professor and Head of Biostatistics, University of Minnesota School of Public Health; and Senior Statistical Scientist at RAND. His research covers Bayesian methods, development and application; clinical and field studies; health services research; environmental risk assessment; genomics; and survey methods. He is an elected member of the International Statistical Institute, a Fellow of the American Statistical Association, the American Association for the Advancement of Science (AAAS), and the Institute of Mathematical Statistics; is a National Associate of the National Research Council.

Current service includes Associate Editor, the *Annual Review of Statistics and its Application*; member of the Technical Advisory Group to the Sub-Saharan Africa Consortium for Advanced Biostatistics Training; the NIH-NIDDK Expert Evaluation Committee of the Alliance of Randomized Trials of Medicine versus Metabolic Surgery in Type 2 Diabetes; the Advisory Committee to the Educational Program on Responsive Survey Design for Efficient Survey Data Collection, Institute for Social Research, University of Michigan; and serves on several clinical trial data and safety monitoring boards.

Former service included coordinating editor of the *Journal of the American Statistical Association*, co-editor of *Biometrics*, and president of the International Biometric Society. He chaired the American Statistical Association's Section on Bayesian Statistical Science, and the AAAS Statistics Section. He served on the Health Review Committee of the Health Effects Institute, on the NIH/NIEHS Board of Scientific Counselors, and chaired the COPSS-CMS Committee on Assessing Hospital Performance. National Academies service included the Committee on National Statistics, the Committee on Applied and Theoretical Statistics, the Panel on Estimates of Poverty for Small Geographic Areas, the Panel on Formula Allocation of Federal and State Program Funds (chair), the Board of the Medical Follow-up Agency, the Panel to Assess the Health Consequences of Service in the Persian Gulf War, the Committee on the use of Third Party Toxicity Research, and the Standing Committee on Risk Assessment.
